Project Name: “Application for City Bicycle Rent”

Technologies Used: HTML, CSS, JavaScript, PHP, MySQL

Description:

Developed a web-based application that allows users to rent bicycles online within the city. The system enables users to view available cycles, book rentals, and return them efficiently. Admins can manage inventory, update cycle availability, and monitor rental records.

Key Features:

- User registration and secure login system
- Real-time bicycle availability and booking
- Automated rental fee calculation
- Admin panel for inventory and user management

Outcome:

Built a user-friendly and eco-friendly platform that simplifies city bicycle rentals and promotes sustainable urban transportation.
